Sixty-One Years

OF HONEST SERVICE and DEPENDABLE SEEDS TO THE GARDENERS OF MISSOURI

L. H. ARCHIAS, Sr.
1869 1944

Leon Henry Archias, our beloved President, died on August 28, 1944. Born in Helena, Arkansas, Mr. Archias entered the Seed and Nursery Business early in life, and opened his first Seed Store with his brother at the age of 15 years. Like his father and grandfather before him, Mr. Archias loved flowers and growing things and working with the products of the soil. One of his greatest devotions was to his profession: the improvement of varieties, the dissemination of good seeds and plants, so that his customers would succeed with their plantings.

We pledge our efforts to "carry on" his good example of honest dealings, good seeds and untiring, courteous service.

Dear Friends:

For sixty-one years we have served the Farmers and Planters of Missouri and our surrounding territories; this fact should speak well of our dependability. When we tell you that you can send your order to ARCHIAS with complete confidence, we mean just that! Your order will be filled promptly and we **guarantee** everything to reach you in a satisfying condition. If you are not entirely pleased when the merchandise arrives, it may be returned within five days for complete refund of your money or have your order refilled without charge. You are to be the judge and you are to be pleased or it costs you nothing.

We hope you are making plans for a big garden again this year. At this writing the war is not yet won. Lots and lots of food will be needed for a well fed army, for civilian consumption and for relief in Europe. Be assured of plenty for your family, no matter what happens and help relieve the demand in commercial food channels.

About Nursery Stock, Fruit Trees and Berry Plants, we believe now is the **time to plant**. Now—when you can afford to improve your place, plant trees that will bear fruit later when the economy of the country may not be so good as now. It pays to look ahead—invest in the future and lay away for a rainy day.

We will be looking for your orders. We hope you will send them early—and often—and be assured we'll do our best to please you. We are,

Sincerely yours,
ARCHIAS' SEED STORE
L. H. Archias, Jr. President

Our liability in all instances, is limited to the purchase price of the seeds.

It Really Soaks the Soil
Puts the Water On the Ground Where it Belongs

Soil-Soaker, open only at one end, screws to the end of the water hose, replacing the nozzle of sprinkler.

When the water is turned on, Soil-Soaker fills with water, and normal pressure forces water through the pores of the entire surface of Soil-Soaker, uniformly, without spray. The soil is soaked deeply and thoroughly, covering an area on all sides of Soil-Soaker. Far more beneficial than light surface sprinkling.

Archias' Quality LAWN GRASSES

One pound of Grass Seed Sows 200 Square Feet. Many seedsmen cheapen their lawn grass mixtures with chaff (inert matter), Timothy and other coarse grasses that make unsightly lawns and soon die. Such mixtures, although costing less per pound, require twice as many pounds per square foot. Our mixtures contain only the highest quality seed of the finest turf growing grasses, blended in ideal proportions, based on our 58 year's experience.

Practical information on "How to Make a Better Lawn" given FREE with every order of lawn seed and supplies.

ARCHIAS' "MISSOURI GROWN" KENTUCKY BLUE GRASS. Used more for lawns than any other grass. However, should be mixed with other quicker growing grasses—especially valuable as a pasture grass. Archias' Kentucky Blue Grass is Missouri grown and acclimated. Thoroughly re-cleaned, free of weeds and of high germination. Sow 1 pound to each 200 square feet of lawn; 3 bushels to the acre for pasture.

BROME GRASS

"THE MIRACLE DROUGHT RESISTER"

One of the most sensational additions that American agriculture has received in years. It is rather slow the first season, but the second year is great and once established you have it for keeps. It is hardy, permanent, stands the driest of droughts, the hottest summers, and the coldest winters. It is the first green grass in the spring, the last in the fall, and stays green all summer when other grasses are dry. It is very high in feeding value; will carry from 50 to 100 per cent more livestock per acre than Blue Grass. Cut for hay, you will have from three to four tons per acre. All classes of livestock like it as it is very palatable. It is a grass and so it cannot poison the stock. Sow either fall or spring using 15 to 20 lbs. per acre. Have a firm, well packed seed bed, harrow in lightly and roll well if at all possible. Do not cover too deeply—one-fourth to one-half inch is plenty. You can get two crops in a season. Harvest when it is one-third to one-half in bloom. It is easily killed under cultivation if you want to get rid of it. Our Brome Grass is native grown and adapted to our climate. 10 lbs., \$2.55, postpaid. See Field Seed List for quantity prices.

ALFALFA

Archias' northern and native grown Alfalfa deserves to rank first among the legumes. Extremely deep rooted, it withstands the drought as well as the severe winters. Save money and get a dependable seed by buying your Alfalfa from Archias.

Archias' Missouri 8

Main Crop Yellow—120-125 days

Developed by Mo. Agricultural College. In use for 8 years. In 6-year trials in Missouri, out-yielded Reid's Yellow Dent 36 per cent. A smooth, yellow corn, not flinty, prolific, tending to two or more good ears on fair soil and in good season. Big-rooted, strong-stalked, making it drought- and wind-resistant. Is also disease-resistant. Dark green foliage.

Archias' Missouri 47

Main Crop Yellow—110-115 days

Also developed by Mo. Agricultural College. Strong and vigorous, medium height, much the same as Mo. No. 8 except about 10 days earlier. Ranked first in 48 tests in Eastern Kansas in 1939-40 trials and is a leader in many other trials. In official tests in Missouri over a 3-year period, out-yielded Reid's Yellow 48 per cent.

Missouri 148

120-125 days

Seed supply of this new variety very limited. Order at once before we are sold out. Missouri 148 parentage is similar to Missouri 8; however, in breeding this new hybrid the undesirable features of Missouri 8 have been removed, retaining the good features and many of the good features of U. S. 13 have been added.

A very tall hybrid with deep green foliage. Ears borne high, are long and somewhat tapering. Kernels medium yellow with medium indentation. Resistant to lodging under most conditions. Best adapted to the area south of the Missouri river. No. 148 was near the top in many of the state yield tests in 1942.

Archias' "Special Strain"

U. S. 13

Main Crop Yellow—120-125 days

A grand hybrid in every way and very popular throughout the corn belt. Single ear tendency. Deep kernels high in feeding value. Resistant to drought and chinch bug. Shucks easily. Stands up well. The first hybrid to ever win the Grand Championship at the International in Chicago, in both 10-ear yellow and shelled corn class.

US 13 Extra Heavy Producer

Never have we seen a variety of corn that had such unanimous farmer approval as U. S. 13. They like its large well-formed ears, its fine feeding qualities, its strong stalks and its enormous yields. Looks and feeds like open pollinated corn but what a difference in production. Its nice big ear on every stalk. Its erect growth. Its resistance to chinch bug damage. Its rapid vigorous growth and its fine dark green color. All these are found in U. S. 13. It comes as near to being one ideal corn as any Hybrid.

ALL OF OUR SEED CORN

HYBRID SEED CORN

FUNK'S "G" HYBRIDS *Home Grown*

FUNK'S HYBRID G-94

Medium to full season in maturity, this single-eared yellow hybrid has enjoyed an outstanding record through Northern and Central Missouri, and Kansas. Has the highest 2-year record in Kansas test—69.29 bushels in the Northwestern section. Is in the top two in Northern Missouri 2-year averages and in 1940 placed in the top group in both Central and Northern Missouri.

Leafy, dark green; grows to medium height, and stands up exceptionally well, surviving chinch bug and root worm attacks. Resistant to grasshoppers, heat, drought and Stewart's Disease. Its cold resistance allows it to be planted early, giving time to mature the large single ears of exceptional grain quality.

FUNK'S G-80

Full season in maturity (about one week later than G-94), a single eared yellow variety.

G-80 is a new, rapid growing, high yielding hybrid that has unusual stalk qualities enabling it to stand up even when storms level other corns. This hybrid has demonstrated its ability to withstand wind, drought, chinch bugs, Stewart's Disease and ear worms. It will deliver a rich golden harvest of excellent feeding quality, good deep kernel corn on soils of varying fertility levels. A winner in state yield tests and private trials, it is the answer to many of the corn growers' problems in Central and South Missouri and Kansas.

FUNK'S WHITE HYBRID G-527W

Medium to full season in the northern half of Kansas and Missouri, and medium for southern half

of these states and Arkansas and Oklahoma.

A rapid-growing, new white development which has yielded right up with yellow hybrids throughout our territory. Single ears of excellent milling quality, produced on good strong stalks. We have never been able to produce enough of this white seed to supply demand. Early orders are recommended.

FUNK'S HYBRID G-53

Early in maturity, single eared yellow variety. Is suited for late planting over Kansas and Missouri. Best suited to good fertility, it also gives a good account of itself on average fields.

A favorite with feeders, G-53 has a dimple dent and is the softest corn we produce with high marketable and feeding value. Medium-height corn bears a single ear, medium low on the stalk. Stands up and holds the ear on the stalk and picks easily. Chinch bug, root-worm, cold, heat and drought resistant.

FUNK'S HYBRID G-169

Early maturity, single eared. Is recommended for northern Missouri and Kansas.

G-169 is a new, single eared yellow Hybrid with the ears carried at medium height, convenient for hand or mechanical picking. Superior stalk quality and excellent root system enable this Hybrid to stand up when less sturdy selections go down. G-169 produces a fine looking corn of excellent feeding quality.

ZOTOX Crab Grass Killer

A Selective Chemical

When Zotox is applied in the Minimum Solution it kills Crab Grass without destroying permanent lawn grasses. The selective action attributed to the fact that Crab Grass has broader leaves and absorbs more of the chemical than do the narrow leaved turf grasses. Being a shallow rooted annual also makes Crab Grass less resistant to Zotox than are the deep rooted perennial grasses.
